Smart & Pretty

WE MAKE STUFF. FOR YOU. FOR YOUR BRAND. FOR OURSELVES

World class brands and lo-fi bands, entrepreneurs and raconteurs, cultural institutions and craftsmen alike work with us because of our inventive thinking, classic design sense, abundance of facial hair, and our honest approach to the business of image making.

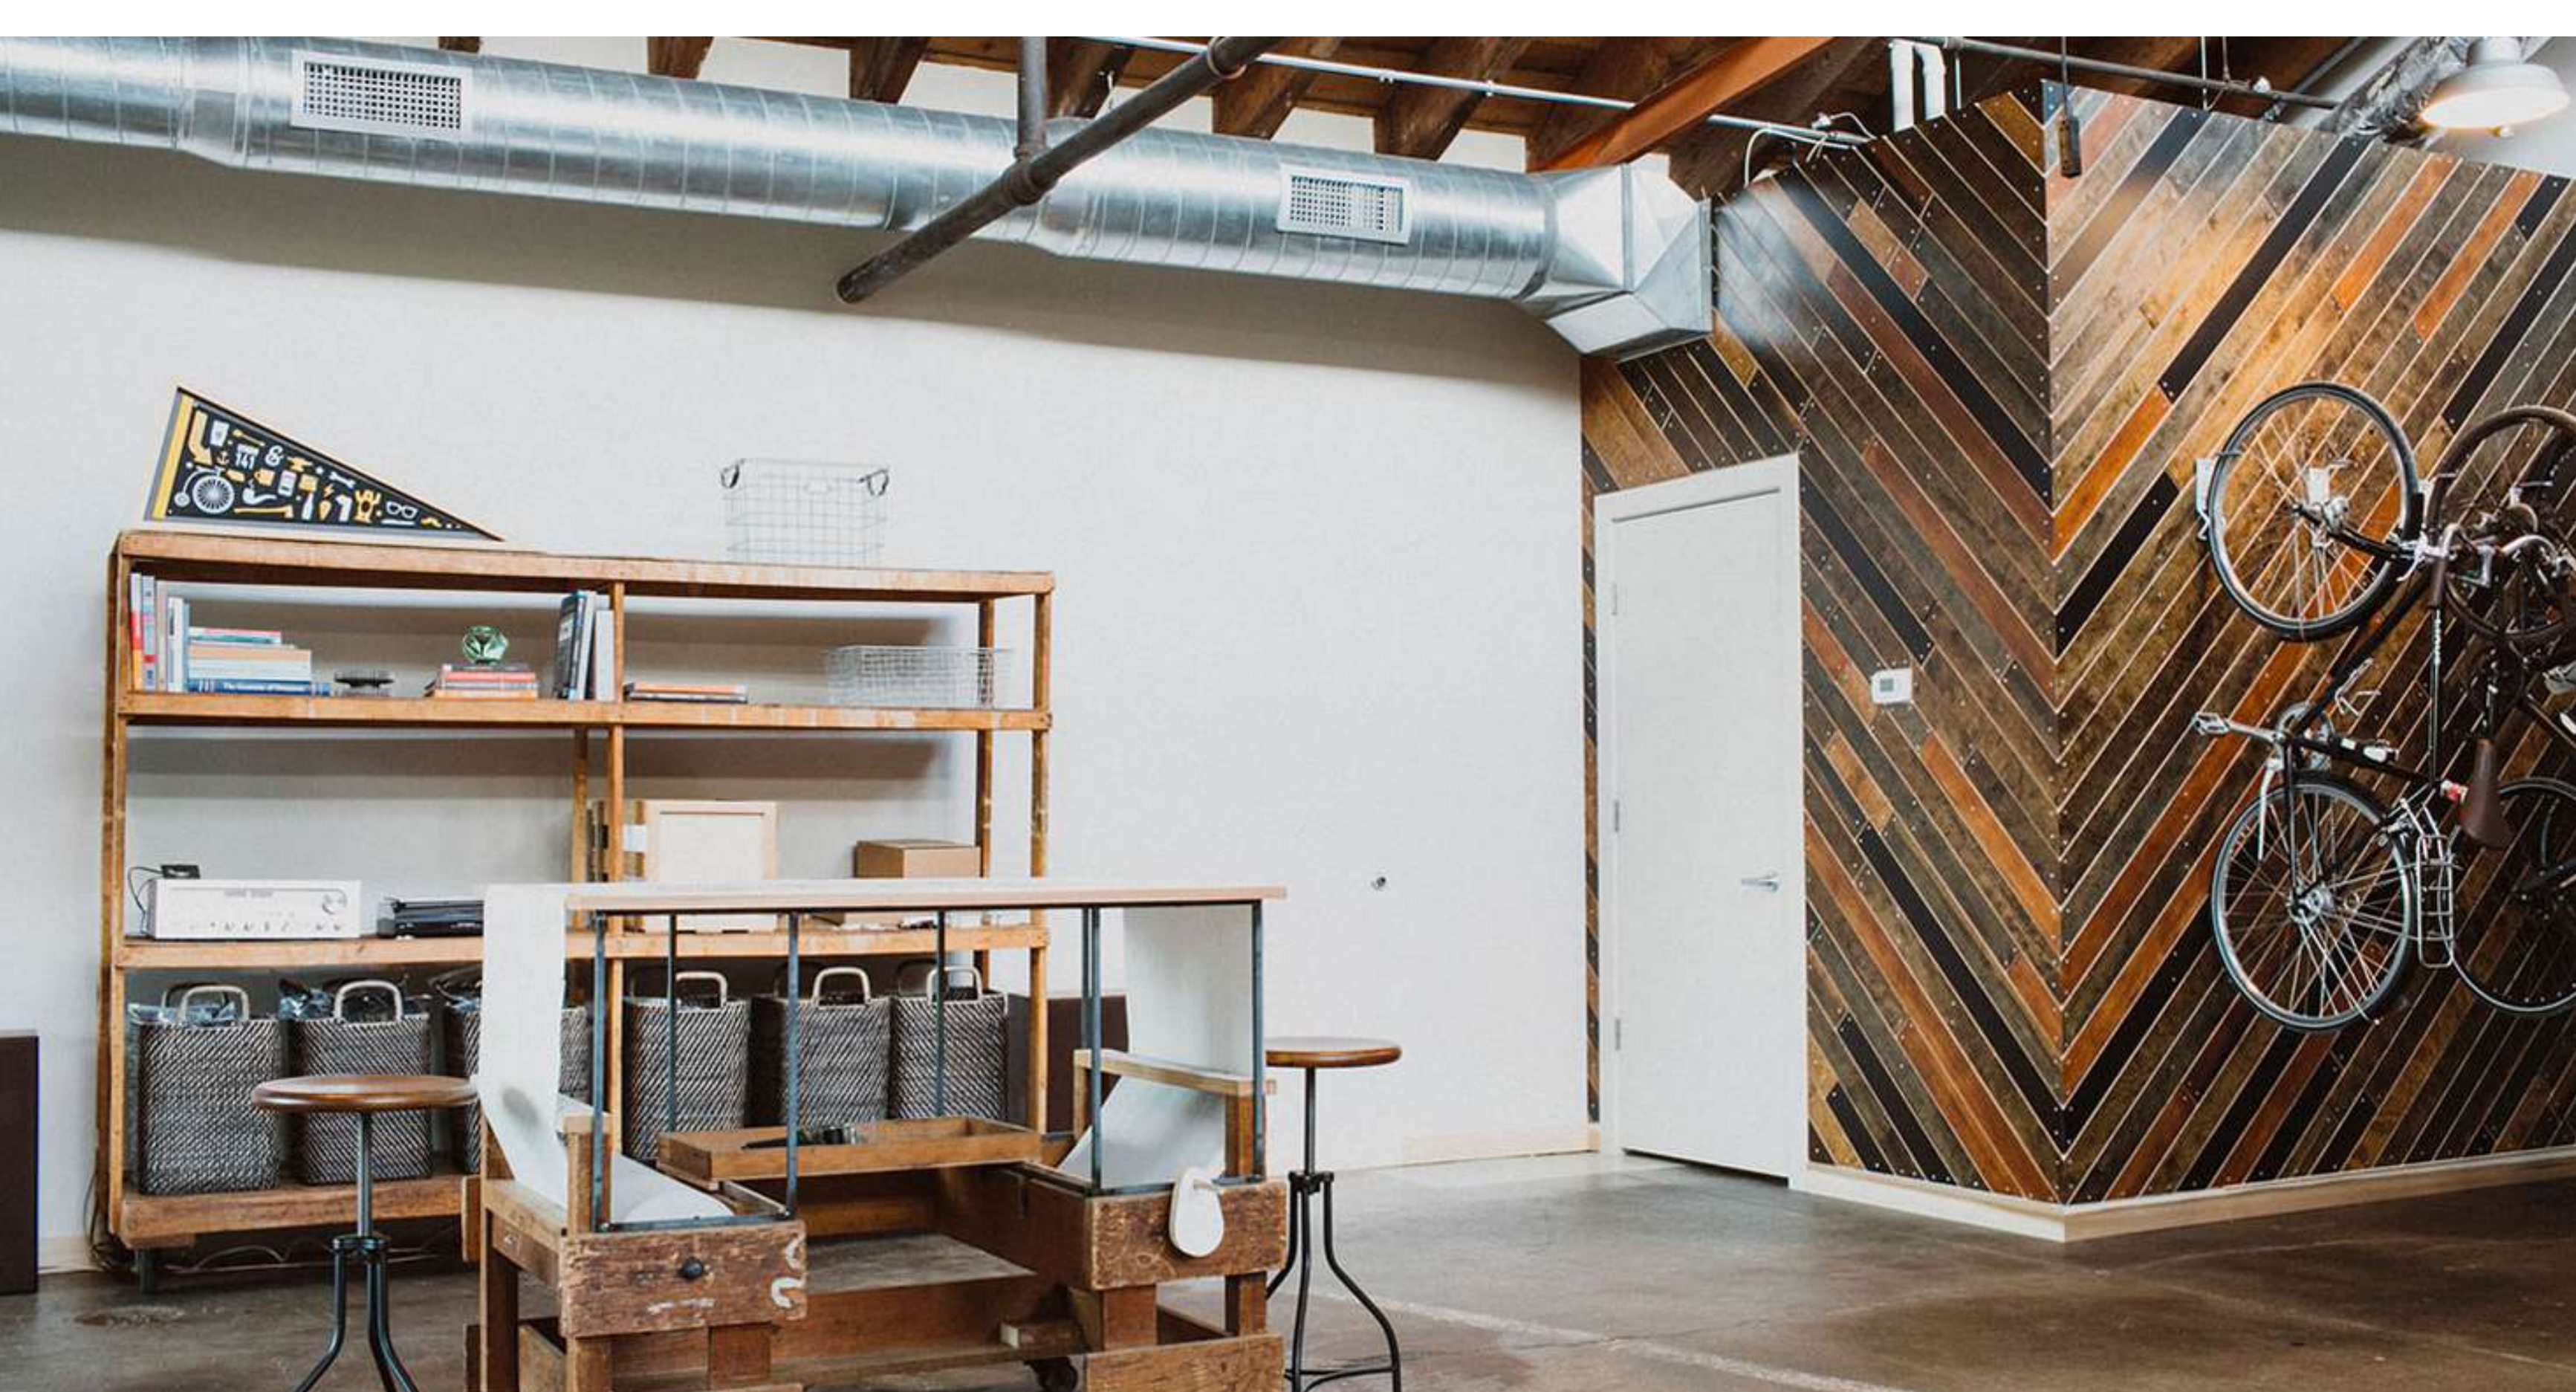

History

Conceptualized in 2011 by neighbors; Atul Prabhu and Rupam Mazumdar, RoomCentral is a booking engine and a cloud-based property management system (PMS) that offers property owners tools and solutions for seamless reservation and property management. RoomCentral is a product of HOSTRA Systems which launched in 2011. Conceptualized in 2011 by neighbors; Atul Prabhu and Rupam Mazumdar, RoomCentral is a booking engine and a cloud-based property management system (PMS) that offers property owners tools and solutions for seamless reservation and property management. RoomCentral is a product of HOSTRA Systems which launched in 2011.

Our Vision

Driven by our own wanderlust, the RoomCentral team makes discovering and exploring the world easy for the masses. We believe hotels, resorts, home-stays and hostels are the windows through which we view the world outside us. We build software that enables them to focus on making their guests feel at home by simplifying the Property Management and Booking experience for both themselves and their guests. RoomCentral enables businesses to sell more rooms, while providing their guests with a more transparent and tailor made travel experience.
